15, 14, 13, 12, 11, 10, 8, 7, 5, 4, 3, 2 & 1

FIRE ALARM SYSTEM INSPECTION: You will hear **FIRE ALARM BELLS RINGING** from time to time, and we apologize for any inconvenience. At the same time if your building has a sprinkler system it will be tested; this may cause some harmless water discolouration from sediment in the pipes. To remedy this possible effect, let the water run until it clears.

IN-SUITE INSPECTIONS: CAN/ULC S536-04 (Standard for the Inspection and Testing of Fire Alarm Systems, Section 6 - Periodic Inspections and Tests, Yearly) requires **MANDATORY** testing of all in-suite devices.

Thank you for your compliance and patience.
